

Q: What are the requirements to apply to AIT?**A: Academic Requirements**

Master's Programs: A Bachelor's degree from a recognized university, usually with a GPA of at least 2.75 (or equivalent) on a 4.0 scale. Some programs may have higher GPA requirements or require a degree in a specific field.

Doctoral Programs: A Master's degree from a recognized university, with a strong academic record (typically a GPA of 3.50 or above on a 4.0 scale). Evidence of research ability, often in the form of a Master's thesis, is usually required.

English Language Proficiency

Since English is the official language of instruction at AIT, applicants must demonstrate a certain level of English proficiency. This is typically done by submitting a satisfactory score from one of the following standardized tests:

IELTS: A minimum score of 6.0 (with no band score below 5.5) is generally required for Master's programs.

TOEFL: Internet-based (iBT): A score of 80 or higher.

Paper-based: A score of 550 or higher.

AIT's own English Entry Test: The institute also offers its own test for applicants who are unable to take the IELTS or TOEFL.

Required Application Documents

When applying, you will generally need to prepare the following documents:

Completed Application Form: This is usually submitted online through the AIT admissions portal.

Official Transcripts and Degree Certificates: You will need to provide certified copies of your academic records from all universities previously attended.

Two Letters of Recommendation: These should be from professors or employers who are familiar with your academic and/or professional abilities.

Statement of Purpose: A written essay detailing your academic and career goals, and why you are interested in the specific program at AIT.

Proof of English Language Proficiency: Your official IELTS, TOEFL, or AIT test score report.

Copy of your Passport

Curriculum Vitae (CV) or Resume

Q: What programs offers from AIT?**A: School of Engineering and Technology (SET)**

SET is the largest school at AIT and focuses on a wide range of engineering and technology disciplines.

Key Program Areas:

Civil and Infrastructure Engineering: This includes specializations in structural engineering, geotechnical and geoenvironmental engineering, water engineering and management, and transportation engineering.

Industrial Systems Engineering: Focuses on improving complex systems and processes.

Information and Communication Technologies: Covers computer science, information management, telecommunications, and remote sensing and geographic information systems.

Mechatronics: An interdisciplinary field combining mechanical engineering and electronics.

Microelectronics and Embedded Systems: Deals with the design and fabrication of microchips and integrated circuits.

Nanotechnology: Focuses on manipulating matter on an atomic and molecular scale.

School of Environment, Resources and Development (SERD)

SERD addresses complex global issues related to the environment, resources, and sustainable development.

Key Program Areas:

Agribusiness Management: Combines agricultural science with business management principles.

Agricultural Systems and Engineering: Focuses on sustainable agricultural practices and technologies.

Aquaculture and Aquatic Resources Management: Deals with the farming of aquatic organisms.

Climate Change and Sustainable Development: Addresses the challenges of climate change and pathways to a sustainable future.

Environmental Engineering and Management: Focuses on solving environmental problems through engineering solutions.

Food Engineering and Bioprocess Technology: Covers the processing, preservation, and safety of food.

Gender and Development Studies: Examines the role of gender in development processes.

Natural Resources Management: Focuses on the sustainable use and conservation of natural resources.

Regional and Rural Development Planning: Deals with the planning and management of development in rural and regional areas.

Urban Environmental Management: Focuses on the environmental challenges of cities.

School of Management (SOM)

SOM offers business and management programs with a focus on a global and sustainable perspective.

Key Program Areas:

Master of Business Administration (MBA): A comprehensive program covering all aspects of business management.

Master of Science in Business Analytics and Digital Transformation: Focuses on using data to make business decisions and manage digital change.

International Executive MBA (iEMBA): Designed for experienced professionals.

Doctor of Philosophy (Ph.D.): A research-based program in various fields of management. AIT also offers a variety of certificate programs and short courses for professional development. For the most detailed and up-to-date information, it's always best to check the official AIT website.

Q: How to apply online AIT?

A: Applying to AIT is a fully online process.

1. **Visit the Online Portal:** Applications are submitted through the official AIT admissions website: <https://admission.ait.ac.th/>
2. **Complete the Form:** Fill out all required information and upload the necessary documents.
3. **Pay the Application Fee:** A non-refundable fee (generally US\$25 or 800 Thai Baht) is required to complete your submission.

Q: When application form open?

A: The Asian Institute of Technology (AIT) application forms for the August intake are typically open now. The deadlines for applications and financial aid vary by program and semester. For the January semester intake, applications are open now. For the August intake, which is for the School of Engineering and Technology (SET) and School of Environment Resources and Development (SERD), the application is also open. The School of Management (SOM) has separate deadlines for March and June intakes.

Key Deadlines:

January Semester Intake: Applications are currently open.

August Semester Intake: Applications are open.

School of Management (SOM):

March Intake: February 15 (overseas, requiring educational visa), February 25 (other applicants)

June Intake: May 15 (overseas, requiring educational visa), May 25 (other applicants)

AIT Scholarships: June 10 is the deadline, according to the Asian Institute of Technology.

Other Scholarships: March 31 is the deadline, according to the Asian Institute of Technology.

DAAD Scholarship: November 20 (AIT deadline is November 15).

Q: What scholar offer from AIT?

A: Royal Scholarships

These are the most prestigious scholarships offered at AIT, providing full financial support.

They are awarded to exceptional candidates with outstanding academic records.

- **His Majesty the King's Scholarships:** This scholarship covers **full tuition fees**, provides a **stipend for living expenses**, and offers a **return airfare ticket**. It is available for students from all Asian countries to pursue a Master's degree in any program offered by the School of Engineering and Technology (SET) or the School of Environment, Resources, and Development (SERD).

- **Her Majesty the Queen's Scholarships:** This scholarship also covers **full tuition**, a **stipend**, and **airfare**. It is awarded to female candidates from Asian countries to pursue a Master's degree in programs offered by SET or SERD.

Government Scholarships

Several governments partner with AIT to offer scholarships to their citizens. The most notable one is from the Royal Thai Government.

- **Royal Thai Government (RTG) Scholarships:** These scholarships are funded by the Thai government and are available for students from developing countries. They typically cover a significant portion of the tuition fees. There are different categories, including:
 - **GMS (Greater Mekong Sub-region) Scholarships:** For students from Cambodia, Laos, Myanmar, Vietnam, and Yunnan province in China.
 - **ASEAN Scholarships:** For students from other ASEAN member states.

AIT's Own Scholarships

AIT provides several scholarships directly from its own funds to attract talented students from around the world.

- **AIT President's Scholarships:** Awarded to students with excellent academic records. This scholarship usually covers a portion of the tuition fee (often 50% to 75%).
- **AIT Fellowships:** These are partial tuition scholarships awarded based on academic merit. The value of the scholarship varies.
- **Dean's Scholarships:** Offered by the deans of the three schools (SET, SERD, and SOM) to outstanding applicants in their respective fields.

External and Partner Scholarships

AIT collaborates with international organizations and development agencies to offer sponsored scholarships.

- **DAAD Scholarship (German Academic Exchange Service):** This scholarship is available for German students wishing to study at AIT.
- **Other Partner Scholarships:** AIT often has agreements with various ministries, universities, and organizations that sponsor students to study at the institute.

Important Note: The availability of scholarships and their deadlines vary each year. It is crucial to check the official **AIT admissions and scholarships website** for the most current information, specific eligibility criteria, and application procedures. Typically, you apply for scholarships at the same time you submit your application for admission.

Q: Can apply below required GPA?

A: Yes, it is sometimes possible to be admitted to the Asian Institute of Technology (AIT) with a GPA below the stated minimum requirement, but it depends on several other factors. While AIT's general requirement is a minimum GPA of **2.75 out of 4.0 for Master's programs** and **3.50 out of 4.0 for Doctoral programs**, admission is not based on GPA alone. AIT reviews applications holistically.

Q: What is the required IELTS or TOEFL score?

A: To be admitted to the Asian Institute of Technology (AIT), applicants generally need a minimum IELTS score of 6.0 (with a writing score of 6.0) or a TOEFL score of 80 (with a writing score of 21-23). Some programs or scholarships may have stricter requirements, potentially requiring higher scores or additional assessments like the AIT Academic Writing Test (AWPT). Minimum Requirements (General):

IELTS: 6.0 overall, with a minimum of 6.0 in the writing section.

TOEFL (iBT): 80 overall, with a minimum of 21-23 in the writing section.

TOEFL (Paper-based): 550 overall, with a writing score of 59-61.

TOEFL (CBT): 213 overall, with a writing score of 25-26.

AIT-EET: 6

Q: To get financial aid, do I need to apply separately for it?

A: No, you do not need to apply separately for the scholarships. Once you have submitted the application online, you will be automatically considered for all scholarships for which the deadline has not expired and for which you are eligible.

Q: How to get financial aid?

A: Once you complete the online AIT Admission form, you will be automatically considered for all the scholarships for which you are eligible by indicating your preference in 'Section E: Financial Support' in the application.

Q: Do I need to pick or choose specific majors before apply?

A: No, you don't need to choose a specific major when applying to AIT, but you do need to indicate your intended field of study and research interest. AIT's Open Master's programs allow for a flexible, multidisciplinary approach where students can design their own curriculum and potentially combine courses from different schools and departments.

Q: Does AIT offer non-degree training programs?

A: Yes, the Asian Institute of Technology (AIT) offers non-degree training programs. Specifically, AIT Extension and the Language Center focus on non-degree continuing education courses for professionals. These programs are designed to enhance skills and knowledge for individuals already working in various fields.

AIT also offers certificate programs, which can be considered non-degree programs, especially for those who may not meet the full degree program eligibility requirements but have relevant professional experience. These certificate programs often have eligibility requirements similar to master's degree programs, but with some flexibility for those with extensive professional backgrounds.

In addition to certificate programs, AIT also provides special programs for students who are not enrolled in a degree program, such as exchange and visiting students. These students can participate in courses or programs at AIT for at least one semester.

Q: Can EET take online?

A: Yes, the Asian Institute of Technology (AIT) offers online English Entry Tests (EET) for applicants. Applicants can choose to take the EET either in person at the AIT campus or remotely online. To register for the online EET, applicants need to meet certain equipment and environment requirements, pay a fee, and register at least 7 working days before the test date . You can apply here <http://languages.ait.ac.th/prospective-students/> .

Q: What minimum EET score need to get?

A: Minimum Score is 6

Q: Does AIT offer accommodation?

A: Yes, the Asian Institute of Technology (AIT) offers on-campus accommodation for students and staff. AIT provides various on-campus housing options, including air-conditioned or non-air-conditioned rooms, cooking or non-cooking facilities, and single or shared occupancy rooms. They also have family units available for students with families.

Q: I want to study at AIT. What does AIT offer and what are the admissions requirements?

A: The Institute offers Doctoral Degrees, Executive Master's Degree, Master's Degrees, Professional Master's Degree, Diploma & Certificate Programs, Non-degree programs & Intensive English language. For eligibility requirements on the Degree Programs, please visit <https://oldweb.ait.ac.th/admissions/eligibility>
For non-degree training, please visit the <https://extension.ait.ac.th/> and <http://languages.ait.ac.th/>

Q: What Academic Programs and Courses does AIT Offer?

A: The Institute currently offers 35 academic programs. For details, please visit our School websites: School of Engineering and Technology (SET) <http://www.set.ait.ac.th/> , School of Environment, Resources and Development (SERD) <http://www.serd.ait.ac.th/> , and School of Management (SOM) <http://www.som.ait.ac.th/> .

Q: What is the duration of study?

A: 2 Year Master's Degree students normally study for 22 months (enrolled in August Intake) and 24 months (enrolled in January Intake) which includes four semesters, two short breaks and one long break between semesters. Doctoral students study for at least 42 months or seven semesters. 1-year Master, Professional Master Program and the Diploma Programs are at least 12 months or two semesters and the Certificate Program is 5 months or one semester.

Q: Do you have academic exchange programs and scholarships for those?

A: Yes, we have academic exchange programs with various partner universities in Asia and Europe. AIT has a limited number of scholarships to assist our students to go on academic

exchange. You can apply for an academic exchange program and the scholarship in your second semester of study at AIT.

Q: Do you provide minors?

A: Yes, AIT provides the option to graduate with a minor. Starting from the August 2020 semester, AIT offers a “Minor in Entrepreneurship”. More minors will be added in 2021. There are no additional cost in pursuing a minor. A total of 12 credits in the minor program are required.

Q: Is all communication and all documents and teaching material in English?

A: Yes, AIT is an English speaking campus. All communication is in English.

Q: Do I need to apply for the scholarships listed on the AIT scholarship website?

A: You do not need to apply separately for the scholarships. Once you have submitted the application online, you will be automatically considered for all scholarships for which the deadline has not expired and for which you are eligible. The type and amount of scholarship given to applicants is on a competitive basis with the main criteria of academic standing. Should you wish to be considered for full scholarships, you must submit an Official English score of 6 including writing and overall that is not older than 2 years. Please check acceptable test results here <https://oldweb.ait.ac.th/admissions/eligibility/>.

Q: How can I obtain the application form?

A: Application to AIT is now fully online. Thus, please apply using the Online Application System <https://admission.ait.ac.th/aoas/Applicant/FirstPage.aspx> .

Q: Who must write my letters of recommendation?

A: Your referees should be well acquainted with your intellectual abilities, academic performance, and personal character. Only applicants for the doctoral degree program must submit at least 2 recommendation letters; no recommendation letters are required for master degree programs.

Q: Will you waive my admission interviews since I was admitted last year but chose not to register?

A: No. As the application assessment varies from each intake, your application in the next intake must be as competitive as those with others applying in that same intake.

Q: What is the AIT English Entry Test (AIT-EET)?

A: The Language Center (LC) offers a 90-minute in-house test of English proficiency called the AIT English Entry Test (EET). The score is based on a nine-point scale similar to the IELTS test. The Writing score, which is the most important at AIT, is based on an essay. The test result will be e-mailed within 7 days. The LC will report the test result to the AIT Admissions

only if the score is satisfactory for provisional admission. If applicants fail to obtain the minimum score requirements for admission, they may take the test again.

There is no limit to the number of times they can take the test, but we encourage applicants to study and improve their English before retesting. The test is conducted several times per week on campus.

Alternatively, the test can be taken online through our online EET test application.

For more information or English test application, please see here

<http://languages.ait.ac.th/prospective-students/>.

Q: Where can I find the information about English classes at AIT?

A: You can find the information on English classes and other services offered by the Language Center here <http://languages.ait.ac.th/>.

Q: Is TOEFL ITP acceptable to AIT?

A: NO, it is not. We only accept Paper Test, CBT and IBT.

Q: How much is the application processing fee?

A: The processing fee is Baht 800 or US\$25.

Q: How should I pay the application processing fee?

A: It must be sent together with your application. Payment must be received in order for your application to be processed. After the submission of your online application, there is option to pay the processing fees through online credit card. The other mode of payment is also available.

Q: Can the application processing fee to be waived?

A: No, it cannot. After submitting the application, the applicant must pay the application processing fee.

Q: How much does it cost to study at AIT?

A: AIT's tuition is charged per credit, so the total will depend on the number of credits required for your degree.

- **Master's Programs:**
 - **Cost per credit:** Approximately **฿16,000 - ฿22,000**
 - **Total Credits:** Most Master's programs require 48 credits.
 - **Estimated Total Tuition:** **฿768,000 - ฿1,056,000** (for the full program).
- **Doctoral Programs:**
 - **Cost per credit:** Approximately **฿19,000 - ฿25,000**
 - **Total Credits:** Doctoral programs typically require 84 credits.
 - **Estimated Total Tuition:** **฿1,596,000 - ฿2,100,000** (for the full program).
- **Other Fees:** You should also budget for a one-time registration fee (around **฿5,000**), student union fees, and health insurance.

Note: The School of Management (SOM) may have different fee structures for its programs like the MBA.

The different program of study costs are in this site: <https://ait.ac.th/tuition-and-fees/>

Q: If I apply and accepted this intake, can I defer to the next intake with the same condition?

A: Yes, you can defer your entry until the next academic semester. However, the financial conditions of the admission may change depending on the competitive assessment for the next semester. You are also required to pay the application processing fee to reactivate your admission.

Q: Are there scholarship grants available for international students to apply for?

A: AIT offers a limited number of financial awards in the form of scholarships for the Master's and Doctoral programs, on a highly competitive basis, to applicants who have been evaluated as outstandingly qualified for admission and who can show proof of financial need during their study at AIT. For details, please go to <https://ait.ac.th/financial-aid/>

Q: Can Flexible Master or Doctoral Program receive full financial support?

A: No, our target audience for the flexible programs are the working people, who are not able to join full time students on campus. Offering of AIT Scholarship for flexible programs are on a very competitive basis.

Q: I am in final year of bachelor degree; can I apply for the Master Degree?

A: Yes, please be sure that you will graduate before the classes begin and the original documents must be shown to the Admissions Office before enrolment.

Q: I am married. Can I bring my family during my study at AIT.

A: Students, who are married and wish to bring their families to AIT, need to submit a copy of passport and a copy of marriage certificate or evidence to support the marital status. These documents must be attested by your Ministry of Foreign Affair and then by Local Thai Embassy at your home country. Please be advised that no spouse or family member is allowed on-campus accommodation until availability of married unit has been confirmed in writing by the student Accommodation Officer. Please also note that under the Thai Immigration Laws, no dependents of Non-Thai AIT students are permitted to work outside AIT under a dependent (Category O) visa. For further inquiries on student accommodation, please contact the Student Accommodation Unit at e-mail: accomodation@ait.asia , Tel: (66-2) 524 5093.

Q: Am I allowed to work in Thailand?

A: Under the Royal Thai Government regulations, foreign students on a student visa are not allowed to take up employment and work in Thailand. However, AIT students are allowed to

work as a Student Assistantship on the AIT campus as Research/Teaching/Administrative Assistance.

Q: Does the Institute apply the class attendance system?

A: All students are expected to attend their classes as per the semester class schedules.

Q: Do you accept transfer of credits?

A: For certain joint degrees and exchange programs, the Institute allows credit transfer (but not grade transfer) as stipulated in the agreements signed with partner universities.

Q: Do I have to wear uniform?

A: Students are not required to wear any uniform. Please note that the climate in Thailand is generally hot & humid. Light clothing is recommended. However, students are expected to wear semi-formal/casual attire in class.

Q: What are the accommodation options and costs?

A: Dormitory (usually including bills): ฿2,500 – ฿7,000 per month

Private Accommodation (bills not included): ฿8,000 – ฿20,000 per month

CSIM specific Question

Q: How many course in the CSIM?

A: CSIM stand for computer science and Information Management

1. Computer Science go to <https://ait.ac.th/program/computer-science/>
2. Information Management <https://ait.ac.th/program/information-management/>
3. Data Science And AI <https://ait.ac.th/program/data-science-and-ai/>

Q: Is this a research-based or course-based program at CSIM?

A: The CSIM program offers both a thesis (research-based) and a project (course-based) track. Students can choose the option that best aligns with their career goals.

Q: What are the key required courses in the Computer Science program?

A: The AIT Computer Science program includes several key required courses. These include Algorithms Design and Analysis, Full Stack Application Development, Theory of Computing, and Programming Languages and Compilers, according to the Computer Science department at Asian Institute of Technology. The program also covers foundational areas like Data Structures, Database Management Systems, Internet Programming, Artificial Intelligence, and Mobile Computing.

Here's a more detailed breakdown:

Algorithms Design and Analysis:

This course focuses on the fundamental principles and techniques for designing and analyzing algorithms, which are essential for efficient problem-solving in computer science.

Full Stack Application Development:

This course provides a comprehensive understanding of the entire application development process, from front-end to back-end, including design patterns and practical project

execution, according to the AIT TEAL 2.0 program.

Theory of Computing:

This course explores the theoretical foundations of computation, including computability, complexity, and formal languages, which are crucial for understanding the limits and capabilities of computation.

Programming Languages and Compilers:

This course delves into the design, implementation, and analysis of programming languages, including the principles of compiler construction.

Data Structures and Algorithms:

This course is a core requirement, covering various data structures (like arrays, linked lists, trees, graphs) and their associated algorithms.

Database Management Systems:

This course focuses on the principles of database design, management, and query processing, which are essential for working with large datasets.

Operating Systems:

This course explores the fundamental concepts of operating systems, including process management, memory management, and file systems.

Software Engineering:

This course covers the principles and practices of software development, including design, testing, and project management.

Networking and Security:

This course introduces the concepts of computer networks, network protocols, and network security, which are vital for building and securing networked systems.

Artificial Intelligence:

The program also emphasizes AI, with courses covering knowledge representation, problem-solving, and specific areas like computer vision and machine learning.

Internet Programming:

This course focuses on the technologies and techniques for developing web-based applications.

Mobile Computing:

This course covers the principles and practices of developing applications for mobile devices.

Q: What is the minimum GPA to enter CSIM?

A: The minimum GPA requirement varies yearly but is usually around 2.75.

Q: What programming languages should I know before starting?

A: Python (highly recommended for beginners)

Java (essential for object-oriented programming courses)

JavaScript (for web development courses)

C++ (for systems programming)

Basic understanding of HTML/CSS is also beneficial. The program includes introductory programming courses for students with limited coding experience.

Q: Do I need to submit a portfolio or programming samples?

A: No, you don't need to submit

Q: Are there internship opportunities from CSIM?

A: Yes, you can apply teacher assistant.

Q: What computer specifications do I need?

A: Recommended specifications:

Laptop with Intel i5/AMD Ryzen 5 or better

Minimum 8GB RAM (16GB recommended)

256GB SSD storage minimum

Dedicated graphics card (recommended for AI/ML courses)

Windows, macOS, or Linux operating system

Reliable internet connection for online components

Q: Who are the professor at CSIM?

A: The Computer Science and Information Management (CSIM) program at the Asian Institute of Technology (AIT) has several faculty members, including Prof. Phan Minh Dung, Dr. Chutiporn Anutariya, Dr. Vatcharaporn Esichaikul, and Dr. Chaklam Silpasuwanchai
